

Rafael Mendoza

Full-Stack Web Developer & Frontend Engineer

rafaelmendozajr94.coding@gmail.com | Long Beach, CA | Phone: Available upon request

Professional Summary

Software engineer with 4+ years of professional experience building and maintaining web applications for clients. Focused on JavaScript, HTML, CSS, WordPress, PHP, React, and Node.js.

Core Disciplines

Frontend Web Development, WordPress & PHP Development, JavaScript & React.js, Node.js & REST APIs, Responsive UI Design, Web Performance & SEO

Experience

Frontend Software Engineer & Mentee – Underdog Devs (BloomTech Partnership) (November 2021 — December 2021)

Remote

Bloom Institute of Technology (then Lambda School) partnered with Underdog Devs, providing the opportunity to work under senior engineering mentorship to gain real-world field experience developing a community web application, pair programming, and shipping production code.

- Built UI components, navigation sidebars, and modal dialogs for the open-source Underdog Devs platform in React.
- Contributed frontend engineering to the Underdog Devs open-source web application using React.js, JavaScript, and CSS3 to support member scheduling and mentorship tracking.
- Implemented dynamic role-based navigation sidebars, user authentication flows, and administrative modal dialogs to filter and manage members.
- Participated in active 1:1 pair programming, code reviews, and collaborative engineering sprints with industry mentors.

Technologies: React.js, JavaScript, CSS3, Ant-Design, Pair Programming, Agile/Scrum, Git
